1 ONE MACHINE

MOVES FROM ONE WORKSITE TO ANOTHER.

FEATURE 1 - MOBILITY

The fastest multi-purpose machine on the market.

MOVES LIKE A DREAM.

Lundberg multi-purpose machines are known for their speed and agility. With our machines, you can work efficiently in narrow spaces and difficult terrain, and you can move easily between work sites. Lundberg multi-purpose machines are convenient to drive – it sometimes feels like the machine almost moves like a dream.

What makes Lundberg multi-purpose machines superior in agility?

Articulated steering and a greater steering angle compared to its competitors guarantee a smaller turning radius, which makes it possible to work in small spaces. A high ground clearance and the large articulation angle of the articulation joint also make it possible to work in challenging terrain. Lundberg multi-purpose machines can also move from work site to work site faster than competing machines, with a speed of 50 km/h. Excellent directional stability guarantees a smooth ride.

	TOP SPEED	DRIVING DISTANCE OF 50 KM TAKES	MORE PRODUCTIVE HOURS
 Lundberg 	50 km/h	 1h	 +163 €
Several other multi-purpose machines 	35 km/h	 1h 26 min + 26 min	 +133 €
Skid steer loaders 	15 km/h	 3h 20 min + 140 min	 More productive hours when you transfer 50 km per day if hourly fee is 80 €.

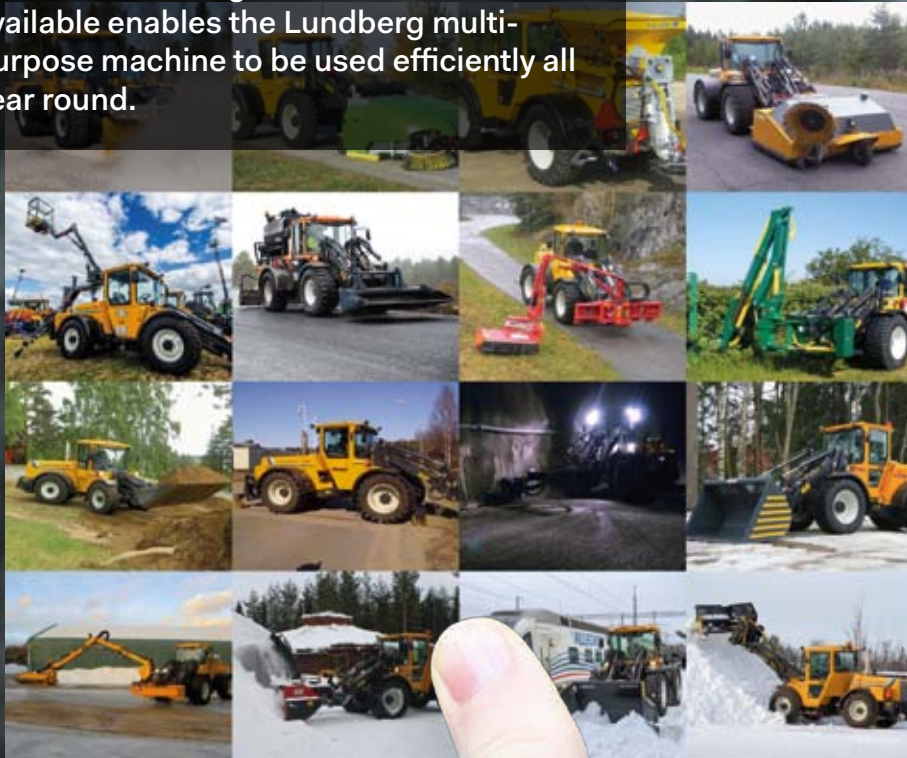

1 ONE MACHINE

MANY WORKSITES.

FEATURE 2 – VERSATILITY

The extensive range of work attachments available enables the Lundberg multi-purpose machine to be used efficiently all year round.

WORK MORE EFFECTIVELY EVERY DAY OF THE YEAR.

The Lundberg multi-purpose machine is a cost-efficient solution to environmental management all year round. Increase your efficiency with versatile tools and by switching between them quickly.

You can sweep, mow, plough, lift, load and sand – with the Lundberg multi-purpose machine, you can do almost every kind of environmental management work, regardless of the time of year.

Modern hydraulics make it possible to attach a variety of tools.

Our product development has created new innovations, such as new hydraulics that can be adjusted and programmed for each tool, and which make it possible to add versatile and powerful attachments. With the Lundberg multi-purpose machine, you can manage the different movements of the machine without interruptions and unnecessary jerking. Switching between tools quickly and easily ensures that work continues without interruptions.

WORK ALL YEAR ROUND

With the Lundberg multi-purpose machine you can complete all work regardless of the time of year.

VERSATILE MANAGEMENT

Advanced driver information center and instrumentation collects the data and diagnostics directly from the engine, as well as from the work and hydrostatic control systems via the CAN BUS.

System allows work- or attachment settings and recordings for different jobs.

A WORK ENVIRONMENT YOU DON'T WANT TO LEAVE.

This powerful machine can withstand heavy use, which does not mean you have to compromise on comfortable working conditions. From the ergonomically designed cab of a Lundberg multi-purpose machine, you can see the entire work site without any blind spots. The controls are designed for long-term work and the inside of the cab is quiet. Working is more comfortable when it continues smoothly and easily.

The Lundberg multi-purpose machines can carry what they lift.

The excellent tipping load and modern hydraulic system of the machines make it faster and easier to work. The most quiet cab on the market is spacious and compact. Ensuring the best possible work ergonomics is a key factor in the machine's design.

VISIBILITY FROM THE CAB

Lundberg – very good visibility

Competitor – frame posts obstruct visibility

The machine's sophisticated control system and CAN BUS technology make it possible to equip the machine with wireless radio control. With this equipment, the machine can also be controlled from outside the machine.

EXAMPLE

	 Lundberg	Several competitors
NOISE		
 Inside	67 dBA	72 dBA
 Outside	101 dBA	104 dBA
TIPPING LOAD		
 Straight	4206 kg	3960 kg
 Articulated	3615 kg	3360 kg
LIFTING CAPACITY		
 Lowered	34,8 kN	35,3 kN
 Raised	59,4 kN	25,2 kN

1 ONE MACHINE

FROM START TO FINISH IN ONE GO.

FEATURE 3 – PRODUCTIVITY

The ergonomically correct work environment enables long and highly productive work sessions.

1 ONE MACHINE

LEAVING NO TRACES.

FEATURE 4

– ENVIRONMENTAL RESPONSIBILITY

Lundberg multi-purpose machines with excellent economy and the lowest noise emissions on the market, are gentle on both the operator and the natural environment.

ENVIRONMENT AND PEOPLE FRIENDLY.

Lundberg multi-purpose machines conserve the environment, spare the driver and save costs. Moderate fuel consumption and management-friendly technical solutions make work more economic and environmentally friendly. The machines do not create unnecessary noise; Lundberg multi-purpose machines are the most quiet machines on the market both inside and outside the cab.

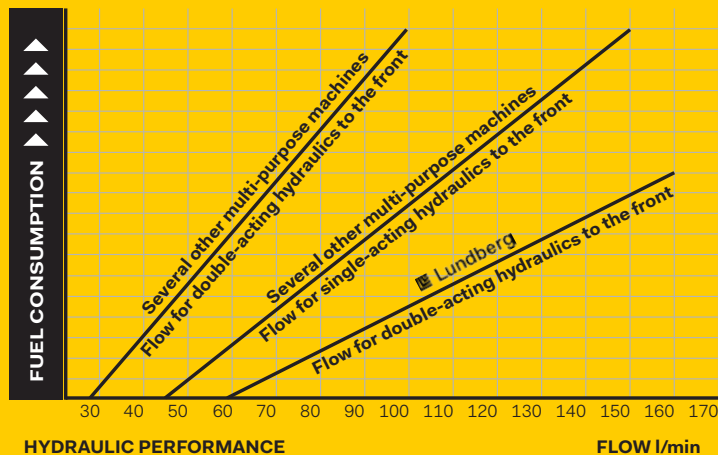

Lundberg multi-purpose machines have a comprehensive maintenance and spare parts network and they retain their value for a long time. Our operations are environmentally certified. We consider it a point of honour that our multi-purpose machines also meet the most up-to-date environmental requirements.

"A very versatile machine for railway work. Very well designed and a quiet cab with an unobstructed view in every direction. These properties are essential in railway work."

"After having many Lundberg multi-purpose machines before, we can say it is an agile machine with huge capacity and a good visibility and comfort in the cabin. The variety of attachments is so wide that the only limitation is our imagination."

Lars Andersson
Kyrkbyns Entreprenad AB, Stockholm
Sweden

"Every Lundberg we have purchased has proved to be reliable. The best properties of these machines are that they are easy to drive and they have good visibility and versatility. Maintenance has also been carried out well."
